

LISTING OF CLAIMS

1. (Currently Amended) An apparatus for providing a pictorial representation, comprising:
on a first media at least one static presentation region for providing at least a first, unchanging pictorial rendering, said first media having at least one opening formed therethrough;
on a second media, different than said first media, a dynamically changing presentation region, said dynamically changing presentation region providing at least a first series of changing renderings, said first series of changing renderings being unrelated to the content of the first, unchanging pictorial rendering; and
wherein said second media is positioned in the opening formed through said first media.
2. (original) An apparatus as in Claim 1, wherein said representation comprises a plurality of static presentation regions.
3. (original) An apparatus as in Claim 1, wherein said representation comprises a plurality of dynamic presentation regions.
4. (original) An apparatus as in Claim 1, wherein said dynamic presentation regions is provided on a flat panel display device.
5. (original) An apparatus as in Claim 4, wherein said flat panel devise is a liquid crystal display device.
6. (original) An apparatus as in Claim 5, wherein said liquid crystal display device is selected from the group of transmissive devices, reflective devices, passive devices, and combinations thereof.
7. (original) An apparatus as in Claim 4, wherein said flat panel device is an FED.
8. (original) An apparatus as in Claim 4, wherein said flat panel device is an EL display device.
9. (original) An apparatus as in Claim 4, wherein said flat panel device is a plasma display.
10. (original) An apparatus as in Claim 4, wherein said pictorial representation is an artistic rendering.
11. (withdrawn) An apparatus as in Claim 1, wherein said pictorial representation is a game board.
12. (withdrawn) An apparatus as in Claim 1, wherein said pictorial representation is a print.
13. (withdrawn) An apparatus as in Claim 1, wherein said static presentation regions may be changed.
14. (original) An apparatus as in Claim 1, wherein said dynamic presentation region is a mechanical structure.

15. (original) An apparatus as in Claim 1, wherein said dynamic presentation region is a projected image.
16. (original) An apparatus as in Claim 1, wherein said dynamic presentation region is a holograph.
17. (original) An apparatus as in Claim 1, further including input/output means for coupling said apparatus to a computer.
18. (original) An apparatus as in Claim 1, further comprising memory means for storing information to be presented in said dynamic presentation regions.
19. (Withdrawn) A method for generating a pictorial representation, comprising the steps of: providing a first region having a static presentation, and providing at least one adjacent region displaying a dynamic presentation; said static presentation region being cast in a first, ~~[non-electronic,]~~ medium and having a plurality of ~~[openings]~~ holes or vias formed ~~[therein]~~ therethrough, said ~~[openings]~~ holes or vias accommodating the dynamic presentation medium which is cast in a second medium, and positioned in said holes or vias.
20. (Withdrawn) A method as in Claim 19, wherein said representation comprises a plurality of static presentation regions.
21. (Withdrawn) A method as in Claim 19, wherein said representation comprises a plurality of dynamic presentation regions.
22. (Withdrawn) A method as in Claim 19, wherein said dynamic presentation regions is provided on a flat panel display device.
23. (Withdrawn) A method as in Claim 22, wherein said flat panel device is a liquid crystal display device.
24. (Withdrawn) A method as in Claim 23, wherein said liquid crystal display device is selected from the group of transmissive devices, reflective devices, passive devices, and combinations thereof.
25. (Withdrawn) A method as in Claim 22, wherein said flat panel device is an FED.
26. (Withdrawn) A method as in Claim 22, wherein said flat panel device is an EL display device.
27. (Withdrawn) A method as in Claim 19, wherein said flat panel device is a plasma display.
28. (Withdrawn) A method as in Claim 19, wherein said pictorial representation is an artistic rendering.
29. (Withdrawn) A method as in Claim 19, wherein said pictorial representation is a game board.
30. (Withdrawn) A method as in Claim 19, wherein said pictorial representation is a print.

31. (Withdrawn) A method as in Claim 19, wherein said static presentation regions may be changed.

32. (Withdrawn) A method as in Claim 19, wherein said dynamic presentation region is a mechanical structure.

33. (Withdrawn) A method as in Claim 19, wherein said dynamic presentation region is a projected image.

34. (Withdrawn) A method as in Claim 19, wherein said dynamic presentation region is a holograph.

35. (Withdrawn) A method as in Claim 19, including the further step of providing said pictorial representation in a computer environment.

36. (Withdrawn) A method as in Claim 19, including the further step of providing at least one of the static presentation region and the dynamic presentation regions at an internet site.

37. (Withdrawn) A method as in Claim 19, including the further step of storing information to be presented in said dynamic region in a memory.

CONCLUSION

Based on the claim listing set forth herein and the previously submitted amendments and remarks, Applicant respectfully submits that the subject patent application is in condition for allowance. Should the Examiner have any comments or suggestions that would place the subject patent application in better condition for allowance, he is respectfully requested to telephone the undersigned attorney at the below-listed number.

Respectfully submitted:
